# APPLICATORS

Megashape Pro is a revolutionary cellulite treatment, that is safe, effective, and require no downtime.

▶ **Negative pressure:**

Combining vacuum negative pressure with a double-helix electric roller (15rpm), the roller enhances the kneading effect of subcutaneous fat by adsorbing skin tissue, and promotes deeper transmission of radio frequency energy.

▶ **Roller mechanical stimulation :**

increase muscle tension and relieve deep muscle pain.

▶ **Radio frequency lifting:**

accurately heat the deep layer of the epidermis, destroy aging collagen fibers, stimulate the synthesis of new collagen, and effectively improve wrinkles

▶ **Cavitation fat reduction:**

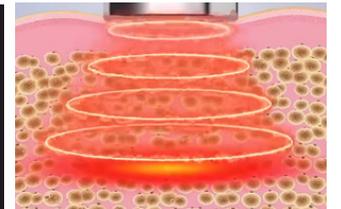

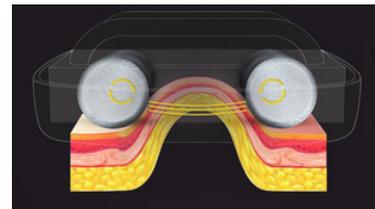

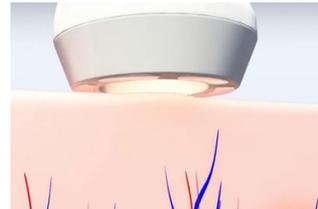

Using 40kHz low-frequency ultrasound to destroy the fat cell

▶ **940nm near-infrared light metabolism acceleration:**

increases blood flow by about 30%, activates aerobic metabolism of fat cells

Through the synergy of multiple technologies, Megashape Pro achieves the full-dimensional effect of "**deep fat reduction** (ultrasound cavitation) - **superficial metabolism** (near-infrared light) - **skin tightening** (radioa frequency) - **circulation optimization** (vacuum roller)", which not only improves fat reduction efficiency, but also improves skin texture, achieving effects of body shaping, anti-aging and improvement of cellulite. .
